SUMMARY

DevOps Engineer with expertise in CI/CD automation, distributed build and release pipelines, containerization, infrastructure automation, and observability, focused on platform reliability, scalability, and operational excellence.

SKILLS

Programming: Python, Bash
DevOps: Linux, Jenkins, Bitbucket, Docker, Git, GitHub Actions, Terraform
Cloud Platforms: AWS, GCP
Monitoring: Grafana, Prometheus, Telegraf, CloudWatch
Security: Coverity, Black Duck, SonarQube

EXPERIENCE

Wipro Limited, Pune

Client: NXP Semiconductors

Software Engineer

Aug 2025 – May 2026

- Developed an on-premise CI/CD orchestration platform to automate Hardware-in-the-Loop (HIL) testing and release workflows.
- Optimized end-to-end release pipelines for multi-platform firmware/driver builds, reducing release cycle time by **30%**.
- Standardized and maintained **100+** Jenkins pipelines handling daily jobs for pre-merge validation, post-merge verification, and cross-platform release builds.
- Deployed infrastructure monitoring and observability stack using Telegraf and Grafana dashboards to track CI/CD system health, pipeline throughput, and job queue metrics.

NXP Semiconductors, Pune

Software Intern

July 2024 – June 2025

- Worked on a Python-based pre-merge validation framework orchestrating static analysis and sanity checks for firmware and driver integration workflows.
- Automated log parsing and failure classification, cutting root cause identification from hours to minutes, **60%** reduction in debugging time.
- Refactored legacy scripts into modular, containerized components, standardizing build artifact reproducibility across development and CI environments.
- Integrated **Coverity** and **Black Duck** into pipelines for static code analysis and open-source security scanning, with automated daily reporting to reduce code defects and ensuring 100% license compliance.

PROJECTS

Scalable and Secure 3-Tier Architecture on AWS

- Built and deployed a highly available, scalable AWS microservices platform using Terraform and GitHub Actions.
- Established observability with CloudWatch dashboards, centralized logging, metrics, and ECS Container Insights, improving monitoring and troubleshooting efficiency.

CERTIFICATIONS

- Google Cloud Certified: Associate Cloud Engineer 🏆
- AWS Certified Cloud Practitioner 🏆

EDUCATION

M.Tech in Computer Science and Engineering (Data Science)

Nirma University, Ahmedabad

July 2023 – May 2025

CGPA: 8.55/10

B.E. in Computer Engineering

LDRP Institute of Technology and Research, Gandhinagar

July 2019 – May 2023

CGPA: 7.94/10
